

Emailage Security & Compliance

At Emailage, we're dedicated to uniting companies across the globe in the fight against fraud. Here's how we've implemented security best practices on your behalf:

 **Employee background checks**

 **Mandatory annual security training**

 **Internal audit and compliance controls**

 **Active vulnerability management and monitoring**

 **Distributed, secure, high-availability data centers**

 **Zero maintenance schedule**

 **Data secured in transit: HTTPS/Transport Layer Security (TLS 1.1+)**

 **Data secured at rest: Advanced Encryption Standard**

 **Third-Party penetration tests**

Compliance and Certifications

SOC 2 Type II

SOC (Service Organization Controls) is an audit framework for non-privacy principles which includes security, availability, processing integrity and confidentiality. Emailage completed our first independent third-party audit for SOC 2, completed Q1 2017. All Emailage data centers comply with leading security policies and frameworks, including SSAE 16, SOC framework, ISO 27001 and PCI DSS Level 1.

EU-U.S. Privacy Shield

The EU-U.S. Privacy Shield Framework provides a set of robust and enforceable protections for the personal data of EU individuals. It offers confidence to EU individuals that their data will be protected and that they will have legal remedies to address any concerns. Emailage certifies that it adheres to its principles and to those of the EU-U.S. Privacy Shield Framework.

ICO - UK

The Information Commissioner's Office is the UK's independent authority set up to uphold information rights in the public interest, promoting openness by public bodies and data privacy for individuals. Emailage holds registration number ZA138498.
